

# OPENING CEREMONY

## World Summit of Local and Regional Leaders Rabat, Morocco, 1-4 October 2013

### Background, challenges and opportunities

1. The 2<sup>nd</sup> edition of the World Summit of Local and Regional Leaders will take place from 1<sup>st</sup> – 4<sup>th</sup> October this year. The City of Rabat, Morocco will host this event, organised by United Cities and Local Governments - global organisation of local and regional authorities.
2. “Summits” bringing together Head of States or national governments are commonplace, however in the world today and in the world of tomorrow, decision making cannot exclusively be limited to a single level of government: decisions taken at local level or other sub-national levels are equally as important. Furthermore, it is not uncommon for leaders of towns, cities or local authorities to be at the forefront in taking important steps in fostering wellbeing and inciting citizens to react.
3. As the United Nations and the international community prepare to take stock of the Millennium Development Goals and to define a new development programme for the next twenty to thirty years, it is also time for local and regional authorities to come together to set forth the **Cities and Regions’ Agenda for the 21<sup>st</sup> Century**. The 4<sup>th</sup> Congress will be central to reflection on the theme of **“Imagine Society, Build Democracy”**.
4. Following our Manifesto regarding “The Cities of 2030”, approved by the World Congress held in Mexico and within the framework of the one hundredth **anniversary of the local government movement in the world**, UCLG proposes that the forthcoming world gathering of local and regional authorities address the **foundations of governance: how to build our future together**.
5. The future of our planet concerns us all, regardless of where we live. In view of this, local and regional governments must contribute their vision in defining the world we aspire to achieve.
6. Ensuring access to basic services and building plural societies that are open to innovation and that promote tolerance, solidarity and exchange, is at the heart of the international movement advocated by UCLG. Gender equality in political, economic and social contexts and the reinforcement of the role of culture in our societies must lead the action of local and regional authorities.
7. **“Imagine Society and Build Democracy”**, the guiding principle of the congress, involves broad-based and permanent dialogue between local and regional authorities, with the involvement of all partners – international organisations, development agencies, experts and actors – as well as civil society organisations, to analyse and assess which development goals have been accomplished and to set new priorities together.

## The main themes of the Summit are the following:

1. **Fostering Wellbeing**
2. **Strengthening solidarity among territories**
3. **Supporting new local governance and the dynamics of change**
4. **Promoting diversity**
